

# Why join EASA as a full active member?

Here are just a few *GREAT* benefits to being a member!

- ***EASA is a specialist trade organization*** – we are the largest international trade association in the world fully dedicated to Electromechanical Services (Motors and Rotating Machines Systems). We have over 1900 member companies, in more than 60 countries around the world
- **Free engineering consulting service** - A team of 5 top industry experts available to answer to all technical questions and support your business - more than 20 000 emails answered per year.
- ***Specialist EASA training programs*** - we offer a wide variety of training specific to the electromechanical industry including seminars, webinars, interactive CDs and online training, on a variety of topics including how to wind a motor, root cause failure analysis and sales and marketing. These can be accessed by anyone in your business to improve skills and practices.
- ***Technical resources:***
  - ***Technical Manual***—EASA’s online *Technical Manual* is available for EASA members in a searchable, digital book format plus access to reports and manuals to inform your business
  - Comprehensive **motor winding data and internal connection diagrams** - EASA has the widest variety of motor data, with data on 260 000 motors including measures and drawings
- ***Tailored industry information and promotional materials to support your business plans*** - Valuable market research/analysis reports, articles and newsletters to share information and promote your company.
- ***Industry representation*** – EASA acts as the voice of the industry worldwide and across all sectors including IEC, IEEE, NEMA, Pulp & Paper and Oil & Gas. With more than 1 million reports written by EASA printed around the world, we deliver presentations and articles to highlight our member interests.
- ***Regional and international networking opportunities*** - Every year EASA organizes the largest electromechanical convention in the world, with 2500 participants and 220 exhibitors members benefit from networking with colleagues from around the globe. Each chapter also organizes its own events where members learn from each other and develop best practice locally.
- ***EASA Accreditation*** – Based on feedback from members we have also developed an accreditation program to demonstrate to industry, energy advocates and regulatory agencies that accredited firms provide repair and maintenance services to an approved standard.
- **[www.easa.com](http://www.easa.com)** – Members can access all of our resources online at [easa.com](http://easa.com) via a unique login number,

***Join today, Visit [www.easa.com/join](http://www.easa.com/join) or Contact [secretary@easa9.org](mailto:secretary@easa9.org)***

- “Since 25 years we are an active member of EASA Region 9. Our internationalization into the Netherlands, Belgium and France would never have been successful without the friends and contacts we made in EASA, that helped us to enter these new markets. Many discussions about the experiences other EASA members had when going abroad, saved us making too many faults, when creating new business. I highly recommend an EASA membership to those electro mechanical repair shops that have to change their strategy and find new markets and products.”

**Christian Vogelsang, General Manager, Vogelsang, Germany**

- “I joined EASA primarily for the networking. To meet with peers and share experiences and opportunities. 30 years later I am still learning and my company and staff have benefited from the educational, training, technical support and visits to other businesses within our industry.”

**David Griffin, CPM/NDC Head Office, Manchester, United Kingdom**

- “We have been members of EASA since 1990. In that time EASA has given us guidance/technical knowledge/network of contacts/access to equipment which has completely transformed our Company. We would simply not be the Company we are - without EASA.

**Derry Sheehan, Avonmore, Cork, Ireland**

- “We are since 40 years EASA Members, the oldest Member from Germany. Due to the world-wide sales of our motors, the Network from EASA becomes everyday more Important. The Networking is the 2nd most important Issue, we have learnt so much through that network. I guess in a globalized world we need more than ever strong networks and associations!”

**Mathis Menzel, Managing Director, Menzel Elektromotoren, Germany**

- “One of the greatest Benefits of membership is access to EASA’s outstanding technical support team and the resources they produce. I have attended numerous EASA seminars and Webinars and always learn something new from the instructors. Webinars provide very cost-effective training, and that’s especially important to us. Our company has been a long-time EASA member; we appreciate the service and Benefits we’ve received over the years.”

**Scott Madden, Scotty’s Electric Motor Repair, Orland, California**

***If you want to go fast, go alone, If you want to go far, go together!***
