2017 Karsten Moholt Exceptional Achievement Award

We are very pleased to announce that the recipient of the Annual KM Award for 2017 is Oliver Semmler of Menzel Elektromotoren. This prize is awarded annually by EASA European & World Chapter to promote young talents in the Electromechanical Service industry and their special achievements.

The 29-year-old electronics engineer for motors and drive systems was recognized for his outstanding commitment working in the in-house load test field of Berlin-based Menzel Elektromotoren, a manufacturer of special motors.

Following Semmler's nomination by his production manager, numerous customers sent letters of recommendation to the award jury, expressing their satisfaction with his prompt work and great flexibility to ensure the quick and trouble-free completion of motor tests.

The award ceremony took place in Valencia in September, during the EASA E&W Chapter 2017 convention. Semmler will use part of the cash prize of 3000 Euro attributed to his company to visit other EASA member companies to further gain experience.

Oliver Semmler attended the EASA European & World Chapter Annual General Meeting in Valencia where he was presented with the award by the Chapter President Mathis Menzel and the General Manager, Frederic Beghain
