2018 EASA Karsten Moholt Exceptional Achievement Award

We are very pleased to announce that the recipient of the Annual KM Award for 2018 is Thomas Ison, Sulzer Electromechanical Services. This prize is awarded annually by EASA European & World Chapter to promote young talents in the Electromechanical Service industry and their special achievements.

Thomas Ison, is a 29 years old project manager from Sulzer and he was for example successfully involved in many technical projects : High Speed Balance Pit Upgrade, Falkirk Test Bed Upgrade and the Project Phoenix (New Sulzer workshop in Birmingham). Tom was not only very well recognized by many of his colleagues but also many customers.

It was not easy to select the winner, we had 5 very good candidates, from 4 different companies and 3 different countries. The only small differences came again from the external references the candidates received to support their candidatures and the quality of their candidature file.

The award ceremony was organized during the EASA/Euromaintenance 4.0 Convention/Conference in Antwerp, Belgium. 1400 participants were attending that conference from 66 different countries and they had the chance to attend 130 different conferences and 20 workshops ! It was the biggest Maintenance conference in Europe on which EASA was one of the main partner, in charge of the Motor 4.0 Track ! FYI, the Euromaintenance conference was organized by Bemas, the European Federation of National Maintenance Societies. More details in the following short video: <https://youtu.be/lpDGRPHe1Q0>

The 4 other candidates (Jon, Craig, Mohsin, Ensar) are already in the selection for the 2019 EASA Karsten Moholt Award competition and the 2020. We will inform them and their company and ask to complete their good file with some good external reference letters from their customers or suppliers.

Congratulation again to Thomas Ison for his important 2018 EASA Karsten Moholt Exceptional Achievement Award !
